(conventional mode of delivery or by distance education).

Prizes

€1000

Winner of "Smart Cities Challenge":

Develop applications (mobile and/or web app) tackling the challenges of urbanization and making urban environments cleaner, safer, more comfortable and highly energy-efficient.

Teams may choose to focus on any of the following sub-challenges: air quality, water and waste water management, energy efficiency, urban mobility, safety and security. The Challenge constitutes an important initiative to inspire innovation & encourage communities to address local issues through data, connected technologies and partnerships.

Prize offered by the Municipality of Ypsonas

THE TECHNICAL STUFF

GITHUB:
link to be announced
during the hackathon

***The teams own the rights to their
applications developed during the competition.**

WHAT'S ELIGIBLE?

- Applications that have been developed during the duration of the hackathon
- Free to use open source code/libraries
(attribution required)
- Applications that use at least one dataset from:
 - National Open Data Portal: www.data.gov.cy
 - DLS Portal and Geoportal: <http://portal.dls.moi.gov.cy/>
 - Any Government Website: Complete List can be found at <https://bit.ly/2NcVTRR>
 - CTO Website: www.visitcyprus.com (i.e. audio guides)

Participants are encouraged to mix these data with data obtained from other sources / APIs such as the European Data Portal, Google, etc... (*technical achievement)

WHAT'S NOT ELIGIBLE?

- **Solutions that use existing Code that was developed prior to the hackathon**
- **Applications that don't utilise any open data from eligible sources**
